

## Vision

*"Accelerating the transition towards sustainable aviation by offering truly independent, future proof and agile aviation fuelling services"*

We want to accelerate the transition towards sustainable and future proof aviation

### Why UPLIFT was founded

- Uplift was founded on the belief that the aviation fuelling industry is at a tipping point currently facing a number of important challenges
- We need a more agile approach to cope with today's challenges and to accelerate the industry's transition towards sustainable aviation

### Mission

- Creating innovative solutions to guarantee a long-lasting business advantage for our customers and for the future of our industry as a whole
- Being a stable and ethical employer and business partner
- Building a centre of expertise around a dynamic and diverse team of domain experts and talented workers

*Fuelling the World of Sustainable Aviation*

## What services we offer

### Consultancy & engineering

- Aviation fuelling activities
- Fuelling infrastructure and equipment
- SAF products supply chain certification

## Founders & Pioneers

Soon after UPLIFT was established by the founders, a group of forerunners with deep knowledge in aviation fuelling joined. Collectively, they bring a combined +140 years of experience in the field

- Management, operations & maintenance for
  - Fuel logistics / into-plane
  - Fuel storage / fuel fleet

- Investments for
  - Fuelling infrastructure
  - Mobile fuelling equipment
  - Innovative projects related to SAF

## Why we are different

*We are reviewing traditional aviation fuelling supply models by applying our unique approach*

1. Focus on our core business and offer fuelling related services only
2. Deep knowledge and expertise in all fields of aviation fuelling
3. Agile & solid funding strategies
4. Privately owned Holding
5. Innovative and future-proof solutions
6. Active involvement in various parts of the aviation fuel supply chain

### Our realizations in 2022 / 2023

- Fuel strategy and management services at Liège Airport, Belgium
- Sustainability projects on SAF - logistics and sales
- Several engineering projects in Europe as well as in APAC region
- Controlling stake in a European aviation fuelling vehicle manufacturer JM Enterprise, Italy (AN)
- Strategic & technical aviation fuelling consultant for Tapetco in Vietnam

## Path to success
